Professional Profile

Highly motivated professional seeking a role in prompt engineering, with a strong foundation in linguistics and computer science. Proficient in designing and developing effective text prompts for AI models, with a keen interest in staying updated on the latest advancements in AI, NLP, and prompt engineering. Collaborative team player with excellent communication and problem-solving skills, eager to contribute to the development of AI-powered products and services.

Work & Projects

Project 1

AI-Powered Chatbot Nov 2025 - Present

- Designed and developed text prompts to elicit specific and accurate responses from the chatbot's AI model.
- Collaborated with a cross-functional team to integrate the prompts into the chatbot, resulting in a 25% increase in user engagement.
- Refined and optimized prompts through iterative testing, improving the chatbot's response quality by 30%.

Project

2

Language Model Tuning Nov 2025 - Present

- Conducted research on the latest advancements in language models and their applications in prompt engineering.
- Developed and implemented a method to fine-tune a pre-trained language model for improved prompt responsiveness, achieving a 20% increase in model accuracy.
- Documented best practices and guidelines for language model tuning, which were adopted by the team for future projects.

Project

3

Conversational AI Interface Nov 2025 - Present

- Participated in the design and development of a conversational AI interface, focusing on creating intuitive and effective text prompts for user interaction.
- Worked closely with data scientists to analyze user feedback and refine the interface, leading to a 40% reduction in user errors.
- Contributed to the development of documentation for the conversational AI interface, ensuring clarity and usability for future development teams.
